

Job Title: Senior Fullstack Developer (React + Node.js) – Cloud Telephony

Company Overview:

We are a fast-growing cloud communications company revolutionizing how businesses connect with their customers. Our platform powers intelligent voice, messaging, and automation solutions for enterprises across industries. We are looking for a seasoned Fullstack Developer to join our engineering team and help scale our next-generation cloud telephony products.

Role Summary:

As a Senior Fullstack Developer, you will lead the design, development, and deployment of scalable web applications and APIs that integrate with our cloud telephony infrastructure. You will work closely with product managers, DevOps, and CEO to deliver seamless user experiences and robust backend services.

Key Responsibilities:

- Develop and maintain responsive web applications using **React.js**, **Redux**, and modern JavaScript (ES6+)
- Build scalable backend services and RESTful APIs using **Node.js**, **Express**, and **MongoDB/PostgreSQL**
- Integrate with cloud telephony platforms (e.g., Twilio, Exotel, Plivo) for voice, SMS, and IVR workflows
- Collaborate with cross-functional teams to define, design, and ship new features
- Optimize applications for maximum speed, scalability, and reliability
- Implement secure authentication and authorization flows (OAuth2, JWT)
- Write clean, maintainable, and well-tested code following best practices (TDD, CI/CD)
- Mentor junior developers and conduct code reviews
- Participate in architectural discussions and contribute to technical decision-making

Required Skills & Experience:

- 7+ years of professional experience in fullstack development
- Strong proficiency in **React.js**, **Hooks**, **Context API**, and component-based architecture
- Expertise in **Node.js**, **Express**, and asynchronous programming
- Experience with **cloud telephony APIs** (e.g., Twilio, Exotel, Knowlarity, Plivo)
- Solid understanding of **RESTful API design**, **WebSockets**, and **real-time communication**
- Familiarity with **NoSQL (MongoDB)** and **SQL (PostgreSQL/MySQL)** databases
- Experience with **Docker**, **Kubernetes**, and **cloud platforms** (AWS/GCP/Azure)
- Proficient in Git, CI/CD pipelines, and Agile development methodologies
- Strong problem-solving skills and attention to detail

Preferred Qualifications:

- Experience with **TypeScript** and **Next.js**
- Knowledge of **VoIP protocols** (SIP, RTP) and **telephony infrastructure**
- Familiarity with **monitoring tools** (Prometheus, Grafana, ELK stack)
- Exposure to **microservices architecture** and **event-driven systems**

Location:

Hybrid / Remote / On-site (Mumbai preferred)

Compensation:

Competitive salary + performance bonuses + ESOPs (based on experience)
